

# FROM FISHY'S FLY BOX

Jay "Fishy" Fullum has been tying flies since the early fifties. During the past twenty years he has designed nearly one hundred productive, innovative patterns for everything from bluegills to bonefish. All of the flies in the video were featured in his CREATIVE TYING column published in FLY TYER MAGAZINE. Other patterns can be found in Fishy's two fly tying books, FISHY'S FLIES and FISHY'S FAVORITES and

A JAR FULL OF HOPPERS, a book of short stories on fly fishing and fly tying. Fishy is featured at fly tying/fly fishing shows from Massachusetts to Texas, where he teaches and demonstrates the art of fly tying using unusual and innovative materials to create realistic patterns.

*"I love developing a new idea or material into something that will catch fish; this is my most rewarding time spent behind the vise. After a new fly is established, it is field-tested. If the fish and I both like the new creation, it is passed on to other fly fishers and tiers. All of the flies in this video have caught fish when other offerings were refused. Have fun tying them, then get out on the water and fish them. I am sure you will be pleased with the response you get from your favorite quarry."*
